Ce-Tek Medical recognise the importance of a high-quality, secure cabinet to store your public access defibrillator

Manufactured from polycarbonate the innovative Ce-tek Medical 4000 is the only polycarbonate AED cabinet on the market that can withstand high impact, is fire retardant to UL94 V0 and is UV stabilised against the effect of direct sun. The Defib Store 4000 is the latest innovative cabinet addition to the widely acclaimed Ce-Tek Medical range of cabinets offering a durable, secure outdoor AED cabinet suitable for all environments. Ce-Tek Medical 4000 features include:

Unique double skin construction provides a robust impact-resistant structure plus creates additional insulation to the defibrillator.

Moulded from fire retardant polycarbonate to UL 94 V0, the Ce-Tek Medical 4000 is self-extinguishing and does not support fire. The polycarbonate is also UV stabilised and will not degrade in direct sunlight

Fully sealed clamshell design, the sleek cabinet is IP66 EN60529 rated providing a completely dust and water tight AED cabinet.

Thermostatically controlled heater ensures the AED is always within its working temperature range

Marine grade, stainless steel mechanical keypad lock; tested with salt spray for 10,000 hours, ensures the lock remains fully functional in all weather. Also available unlocked with a plastic winged handle and optional alarm*

Battery powered, motion sensor LED light to illuminate cabinet on opening. Easily detachable for use as a torch in a rescue
